It is not generally known that days ago, for instance, an officer who sters in size. gave evidence against him at the fawhen stepping out of the tramear, unconscious of the personality he was addressing.

These facts, according to London Tit-Bits, were told to the writer by a man, a great personal friend of the much condemned man, who pointed out the house occupied by the famous prisoner of Devil's Island, as we passed down a quiet suburban thor- ed to find the boy. He had gone but oughfare of the world's gayest city. He had had an interview with Dreywriting at his desk as unconcernedly as a retired banker, determined to take life easy.

He explained that he accepted the "pardon," which many declare he should not have done, at the sole advice of his friends, and on the understanding that he could appeal against the decision. This chance cerned.

Dreyfus, continued my friend, is not a sympathetic man at first sight -rather the other way; but the more you see of him-and I have chatted with him some seven or eight times during the present year—the more you like him. After each conversation your opinion of him improves. You quickly discover this fact, that he views with broad humanity the motives and acts of men who made him curse the hour of his birth a thousand times.

He acknowledged to me one day that his natural inborn reserve had made him many enemies.

"Until I met my wife," he once said to me, "I never cared for the society of anybody. It was wrong, but I never knew it until too late. I sought no friends and acquaintances because I had not the inclination, and because my ambition to succeed made me careful of my time. The hours devoted to friendly intercourse would be better spent in study, I thought. When I joined the general staff, for instance, I made not a single call-just sent my card to superiors and comrades alike. It made bad blood; they thought me un

Dreyfus admits, without a shadow of hesitation, that many features of his case are unexplained to this day. He has many sincere friends, who visit him frequently. Zola was a regular visitor to his house. Thus the ex-prisoner of Devil's Island spends his time, happy in the confidence and love of his wife and children. With the exception of the po-Hise and a few special friends no one knows of his whereabouts.

If Paris knew that the author of that historical and startling book, "Five Years of My Life," in which the writer tells of his sufferings during his five years' banishment, was walking its streets like an ordinary But Dreyfus-nor his most intimate friends, for that matter-is not likely to satisfy its curiosity by making himself known.

Extraordinary Fanaticism.

An extraordinary story of religious fanaticism is being told at Port Antonio, the principal town on the north coast of Jamaica. A negro fanatic named Cousins has been preaching for many years until eventually his religious zezal affected his brain. He claimed to be Jesus Christ returned to earth for a second time, and he thus gained extraordinary influence over the impressionable negroes. One evening he addressed a gathering of the most fanatical of his followers and called upon them to crucify him. They agreed, made a cross and erected it on the outskirts of the town. The preacher was laid upon it, and one of his followers was actually driving a nail through his hand when the police arrived and dispersed the mob. Cousins was released, but immediately fied and has not since been seen.

The Depth of Sleep.

When a person slumbers so soundly that he can with difficulty be awakened we are accustomed to say he is in a "deep sleep." An attempt to measure the depth of sleep, in this sense, has recently been made by Dr. Sante de Sanctis, in Rome, with the aid of a specially designed instrument which prods the sleeper with a more or less sharp point. The doctor has drawn curves showing the relative depth of sleep in different subjects, and in the same subject after being allowed to sleep for different lengths of time. It appears that there are certain times during sleep when waking becomes easier, and a practical application of this result of the experiments is suggested in the adjustment of the time of morning rising to a natural period of Nobody ever talks too little, but a morning rising to a factoral period of each aleep-
